

## Compass Therapeutics Announces Presentation on CTX-8371, A Bispecific Antibody Targeting PD-1 and PD-L1, at the 2022 AACR Annual Meeting in New Orleans

March 30, 2022

BOSTON, March 30, 2022 (GLOBE NEWSWIRE) -- Compass Therapeutics Inc. (Nasdaq: CMPX), a clinical-stage, oncology-focused biotechnology company developing proprietary antibody-based therapeutics to treat multiple human diseases, announced today that it will present preclinical data on CTX-8371, a next generation bispecific checkpoint inhibitor that simultaneously targets PD-1 and PD-L1 at the upcoming American Association for Cancer Research (AACR) Annual Meeting, which is being held April 8-13, 2022, at the Ernest N. Morial Convention Center in New Orleans, Louisiana.

### Presentation Details:

**Title:** Dose Range Finding Study in Non-human Primates Confirms the Unique Mechanism of Action of CTX-8371, a Novel Bispecific Antibody Blocking PD-1 and PD-L1

**Abstract Number:** 5027

**Session Title:** Combination Immunotherapies / Therapeutic Antibodies

**Presenter:** Diana Albu, Ph.D.

**Date/Time:** Tuesday, April 12, 2022; 1:30 pm to 5:00 pm ET

**Location:** Poster Section 32

### About CTX-8371

CTX-8371 is a bispecific antibody that simultaneously targets the programmed death receptor (PD-1) and the programmed death receptor ligand (PD-L1) that are expressed on immune cells and cancer cells respectively. CTX-8371 is currently undergoing IND-enabling preclinical development. In pre-clinical studies, CTX-8371 demonstrated enhanced anti-tumor activity compared to multiple commercially available monoclonal antibodies targeting PD-1 or PD-L1 across several solid tumor animal models, including large syngeneic tumors as well as immunologically resistant melanoma metastasis models. Investigation into the molecular mechanism of action (MOA) of CTX-8371 showed that simultaneous binding of CTX-8371 to PD-1 and PD-L1 resulted in both cell-to-cell bridging and sustainable shedding of the extra-cellular domain of PD-1 from the surface of effector cells. This unique MOA indicates that CTX-8371 has the potential to eliminate PD-1 from the surface of effector cells rather than transiently reducing the ability of PD-1 to bind to its ligands, thus providing sustainable relief of immune suppression, which may explain the observed enhanced activity of CTX-8371 over commercially available anti-PD-1 and anti-PD-L1 monoclonal antibodies. Effectively, it appears that CTX-8371 converts PD-1-positive cells into PD-1-negative cells.

### About Compass Therapeutics

Compass Therapeutics, Inc. is a clinical-stage, oncology-focused biopharmaceutical company developing proprietary antibody-based therapeutics to treat multiple human diseases. Compass' scientific focus is on the relationship between angiogenesis, the immune system, and tumor growth. The company pipeline of novel product candidates is designed to target multiple critical biological pathways required for an effective anti-tumor response. These include modulation of the microvasculature via angiogenesis-targeted agents, induction of a potent immune response via activators on effector cells in the tumor microenvironment; and alleviation of immunosuppressive mechanisms used by tumors to evade immune surveillance. Compass plans to advance its product candidates through clinical development as both standalone therapies and in combination with proprietary pipeline antibodies based on supportive clinical and nonclinical data. The company was founded in 2014 and is headquartered in Boston, Massachusetts. For more information, visit the Compass Therapeutics website at <https://www.compasstherapeutics.com>

### Forward-Looking Statements

*This press release contains forward-looking statements. Statements in this press release that are not purely historical are forward-looking statements. Such forward-looking statements include, among other things, statements regarding the Company's product candidate, CTX-8371, and the development and therapeutic potential thereof. Actual results could differ from those projected in any forward-looking statements due to numerous factors. Such factors include, among others, the Company's ability to raise the additional funding it will need to continue to pursue our business and product development plans, the inherent uncertainties associated with developing product candidates and operating as a development stage company, the Company's ability to develop, complete clinical trials for, obtain approvals for and commercialize any of its product candidates, competition in the industry in which the Company operates and market conditions. These forward-looking statements are made as of the date of this press release, and Compass assumes no obligation to update the forward-looking statements, or to update the reasons why actual results could differ from those projected in the forward-looking statements, except as required by law. Investors should consult all the information set forth herein and should also refer to the risk factor disclosure set forth in the reports and other documents we file with the SEC available at [www.sec.gov](http://www.sec.gov).*
